## Community Resources for Parents of Children with Asthma

Asthma 411 is a comprehensive, evidence-based program in Tarrant County provided by a large group of health care partners. Asthma 411 provides resources for school nurses to help children who have trouble breathing. As part of the program, a school nurse can give a breathing treatment to a child who is struggling to breathe while at school.

Asthma 411 also provides learning tools for schools and families. These learning tools help children and families understand asthma better. When families understand asthma better, they can help their child feel more in control of breathing and improve asthma symptoms.

### Program Goals

**1. Reduce the need for asthma related EMS calls at schools**

**2. Improve school attendance for children with asthma**

**3. Help children with asthma breathe easier so they can learn better.**
